Internal | Tranfer Schedule | the target lot field should be required

1 | ID: [13107](#) | Type: Bug | Created: 11/28/2023, 4:01:31 PM by awaissubhani

Iteration Path: Cattleview React\Sprint 23-20 | State: Closed | Assigned to: awaissubhani | Estimate: 3 | Completed: 3

Acceptance Criteria:

it should be required if we marked checked

Browser: Chrome

Env: QA

Repro-Steps:

After login

Go to lot Transfer Schedule

When we add the lot transfer from the Transfer Schedule screen if the target lot field is marked checked then it should be a required field

The screenshot shows the 'DYNAMIC CLOSEOUT' screen in the Cattle Management application. The table lists various cattle records with details like animal type, contact account number, group code, dates, lot names, lot numbers, origins, risk codes, sources, yard start dates, AOC, carcass prices, cash head counts, cash proceeds, cash weights, checkoff changes, and DOG. A console window at the bottom displays a 500 error message related to a task cancellation exception.

Iteration Path: Cattleview React\Sprint 23-19 | State: Closed | Assigned to: awaissubhani

Acceptance Criteria:

The popup will only be visible when the pen type is Shiiping , Holding or Feeding

Browser: Chrome

Env: QA

Repro-Steps:

1. The Target Pen Type is Different from Shipping, Feeding, or Holding but the popup is still showing

After login

Click on Pen Move Screen from Cattle Management>Select the target pen which has a different type

then click on the Add button

the popup will appear

2. The search is not working on the move count

After login

Go to shipment Screen

Click on search

Enter the value which is given in the Move count

3. in Pen move when we click on the plus sign the system throws a 500 error

4. In Pen Move the pen head count is greater than Pen Move but still the error message shows

The screenshot shows a web application interface for 'PEN MOVES'. The main section displays a table of pen moves with columns for Source Pen, Lot #, Lot Pen Head, Move Count, and Target Pen. Below the table, a network log is visible, showing a POST request to '/api/pen/move' with a JSON body. The log also shows the response, which is a 200 status code with a JSON body indicating success.
